

EXPRESS OF INTEREST FOR A RESEARCHER

The **Lab for Thin Films - Nanosystems & Nanometrology (LTFN)** from AUTH Physics Department, will hire a researcher **with certified background on the field of Organic Electronics (OEs) & Organic Electronic Devices (OEDs)**.

The researcher will be responsible for

- Thin films growth and OED fabrication
- Physical properties characterization, focused on electrical characterization of materials, thin films and OED electrical characterization
- Support of running projects

The candidates must fulfill the following **requirements**:

1. BSc and MSc Degree in Exact Sciences or Engineering
2. Excellent capabilities on computers and internet
3. Excellent knowledge of English

The salary will depend on the qualifications of the applicant that will be selected.

Required documentations:

1. Detailed CV
2. Copies of qualifications, certifications and certificates of service, and any other information documenting the data will be included in curriculum
3. Recommendation Letters.

The submission of proposals and other documents from interested parties will be until **16.09.2012** at **Prof. S. Logothetidis office, AUTH Physics Department, 2nd floor**.

Applications will be evaluated in the order received and will be followed by interview.

For further information call 0030 2310-998174.
